

# News Tracker Application

## Problem Statement

Desmond is a busy businessman who needs to read the news on the go without any difficulties while travelling because he finds it annoying to carry around a physical newspaper. Desmond needs to read the news in a way that eliminates the necessity for him to ever purchase or carry around physical newspapers. Something digital, like an online application that could be viewed from any device that is linked to the Internet, should be small enough to fit in the palm of his hands and accessible from anywhere. for instance, PCs and cellphones.

Question	Description
Who does the problem affect?	Customers such as Desmond.
What are the boundaries of the problem?	geographic, workflow, daily life
What is the issue?	Newspapers on paper are obsolete in this digital age. They are expensive to purchase, quickly broken, contain little information, aren't adaptable to changes, and are of poor quality. By addressing them, physical newspapers could no longer exist and their use might be outlawed. If the issue is not resolved, integrating those who are digitally savvy would become more difficult.
When does this issue occur?	The issue occurs when the customer wants to read the news.
Where is the issue occurring?	The problem arises during consumption, or when people attempt to access information. Using physical newspapers to access information in the digital age is faulty.

<p>Why is it important that we fix this problem?</p>	<p>Since everything in our daily lives is shifting from being a physical or analogue entity to becoming or being converted to digital, it is crucial to address this issue. Information must be accessible from any location. It lessens the inconveniences of obtaining knowledge and information about past events, encourages everyone to be better informed about current events, and will inspire everyone to achieve in-depth knowledge in the areas of their interests.</p>
